

HYDRO-FORCE CX-15™ ROTARY CLEANING TOOL

HYDRO-FORCE
CX-15™

All Angle Cleaning

The CX-15™ rotary cleaner is a crossover tool that bridges the gap between wand cleaning and powered-rotary cleaning. Water pressures between 400 – 800 PSI power the high-speed spinning action of twin jets to make over 4,000 cleaning passes. Unlike traditional carpet wands, the CX-15 can aggressively clean carpet fibers from multiple directions. The unique Hydro-Glide™ glide design at the recovery opening improves water removal and leaves carpets cleaner and drier than a wand or rotary machine. In addition to providing the benefits of all angle cleaning, the surprisingly light CX-15 can be carried up stairs with ease, and because there's no rocking action common with rotary machines, you don't have to worry about your technicians dinging walls, knocking over fragile items or accidentally scratching wood or stone floors. The CX-15 can be run with either a portable or truckmount to clean residential and commercial carpets.

SPECIFICATIONS

- Better Cleaning
- Faster Drying
- Light Weight
- Affordable
- Easy To Operate
- Includes Residential (#NM6022) and Commercial (#NM6024) spray bars
