## MAXXSPACE™ Freshwater Tank/ Electric Hose Reel Combo

Maximize space in your van, improve your productivity, store and easily retrieve your hose, and have freshwater available at all times. With 125 gallons of freshwater instantly available, every job will be hassle-free. The durable, roto-molded rust resistant hose reels hold 200-250' of vacuum\* and solution (pressure) hose with options to customize and expand your capacity. The electric vacuum hose reel provides for powered retraction (via a convenient foot-switch) to reduce fatigue and time spent "tearing" down on the job site. The frame is constructed of high quality powder coated steel, stainless steel, and aluminum to reduce rust and corrosion. The Inlet water pump has up to 4.5 gpm capacity to continuously feed to the solution pump on your truckmount. Finally, the HydraCradle is also equipped with a convenient mounting station for your in-line injection sprayer.

### Key Features

- 125 gallon freshwater tank
- Automatic freshwater shut-off when tank is full
- 200-250' capacity\*, roto-molded rust resistant electric vacuum hose storage reel
- 200-250' capacity, roto-molded rust resistant solution (pressure) hose storage reel
- Convenient mounting station for in-line injection sprayer and wand
- Weight (without hoses) 225 lbs.
- Dimensions: 34" W x 47 1/4" H x 65" L

# HydraCradle

## MAXXSPACE™ Freshwater Tank/ Electric Hose Reel Combo

The **HydraCradle** has eliminated the live hook-up for your vacuum hose reel. It has a bearing on both sides that are held in place by two stainless steel collars. This enhancement allows for:

- Less tension on the axle allows for the end user to pull hose off easier
- Lower amperage draw on the motor
- Lowers torque on the belt and pulleys
- Reduces maintenance on the axle
- No loss of vacuum flow and cfm due to the air having to "travel" through 200-250' of rolled up vacuum hose\*

The **HydraCradle** uses aluminum and stainless steel components and parts designed to reduce corrosion.

The upgraded swivel is rated for higher pressure and temperature than its predecessor. It is all stainless steel construction with Viton seals.

### ***What advantages does having a freshwater tank provide to your truckmount operation?***

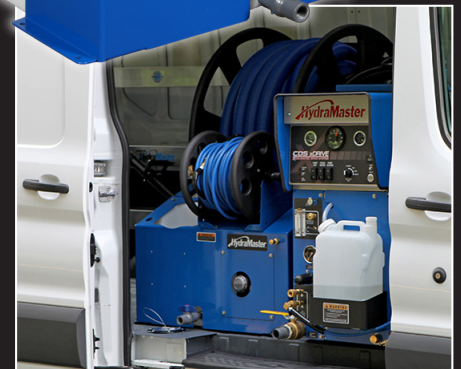

- No stumbling around in gardens and behind thorny bushes trying to find a hose hook-up.
- On commercial jobs, you won't spend 45 minutes looking for a water hose hook-up only to find out you don't have the right adapter.
- You can ensure that your freshwater comes from a clean, consistent source.
- One less hose to have to run.
- Easier and faster set-up, quicker and more efficient tear down on every job.
- Completely self-contained operation.
- Reduce job cancellations on sites where water access is locked up or water has been turned off.
- Make sure you have water available on restoration jobs where availability might be in question.
- Maintain control over the quality and type of water you are using on cleaning jobs.

(Hoses and in-line sprayer not included)

### ***What advantages does having a vacuum and solution hose reel provide to your truckmount operation?***

- Conveniently store up to 200'-250' of 2" vacuum hose\* to increase overall room in the back of your van or box truck.
- Extends the life of your vacuum and solution hose by keeping it off the floor of your van or truck.
- Electric hose reel allows you to quickly and easily retrieve and "roll-up" your vacuum hose saving you time.
- Makes it easier to clean and maintain your hoses making for the best presentation for your customer.
- You can save time and increase productivity by selecting the optional live solution hose reel hook-up. Only "un-reel" the amount of hose you need on smaller jobs with shorter "hose pulls".
