RTU ph - 7.0 -7.5

HYDRO-FORCE®
One U.S. Gallon (3.79 Litres)

- A perfect neutral pre-spray and rinse for stone. It is also suitable for tile and grout not needing restorative cleaning.
- Contains no water conditioning or chelating agents which should not be used on natural stone surfaces.
- Ideal for maintenance cleaning at high dilutions.
- Perfect neutral cleaner for stone countertops.

DIRECTIONS FOR USE

Read entire label before using. Use only as directed. Be sure surfaces to be cleaned are swept or vacuumed to remove loose debris before cleaning. Always pretest surface with cleaning solution for suitability prior to cleaning.

1. For normal soiling, mix two ounces of solution with gallon of warm or hot water (1:64) into a professional spray applicator. For heavy soiling, mix 4 four ounces of solution with a gallon of warm or hot water (1:32) into a professional spray applicator. For application through a Hydro-Force Inline Injection Sprayer, mix 1 quart of solution with a gallon of water in sprayer bottle. Use normal 1 to 8 tip for application.
2. Apply mixed solution with sprayer (mask off sensitive surfaces) evenly and liberally across surface to be cleaned. If preferred, you can apply mixed solution with a damp mop, sponge, or other appropriate professional equipment.
3. For best results, agitate and extract cleaning solution using warm or hot water and a rotary

agitation surface tool such as a Hydro-Force SX-15 or Hydro-Force SX-7. On sensitive surfaces such as soft marble, make sure the floor has been thoroughly vacuumed or swept to remove pebbles, sand or other abrasive material prior to cleaning. For especially sensitive finishes, use the Hydro-Force Gekko tool with brush head instead for extraction. Depending on level of soil, you can simply mop to apply solution. Follow up with a rinse with clean warm or hot water. If using a mop for solution application and surface cleaning, change your mop water often to make sure that soil is not re-deposited.

4. Accelerate drying with airmover like the OmniPro Omnidry making sure to leave no puddling in grout lines.
5. To protect stone surfaces from future stains and spills, consider application of Viper Prestige Water-based or Solvent-based Impregnating Sealers.

For use as a neutral cleaning rinse:
Dilute 1 oz./gallon with hot water for portable units. Mix concentrate in a truckmount unit at one quart per 5 gallons of water. Meter as usual.

For use in Frequent Maintenance Cleaning:
Dilute 1/2 oz/gallon hot water for routine/daily damp mopping. Dilute 1/2 oz/gal for routine/daily cleaning with automatic scrubbing machine.

INGREDIENT DISCLOSURE

Water, Surfactant Blend NJTS#36041932, Isopropanol, Perfluoroalkyl C6-12 Phosphonic Acid.

IMPORTANT NOTICE TO PURCHASER: Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.
