

3M™ Filter Retainer 501 and Adaptor 502

501 Retainer

The 3M™ 6000 Series Gas/Vapour filters have bayonet type fittings to attach them to the 3M range of half and full face pieces. Often there is also a need to simultaneously protect against particulates in the workplace air. To do this the 501 and 502 products enable the user to attach a suitable particle filter to the 60xx filters to provide dual protection.

Features

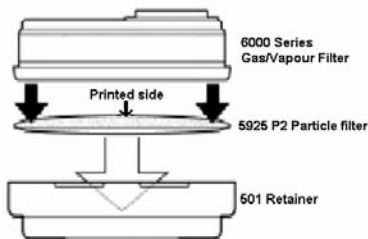

501 Retainer - holds the 5925 P2 particulate filter onto the 60xx gas/vapour filter to provide combination particle/gas/vapour protection to the wearer.

502 Adaptor - allows connection of 2000 Series particle filters (2125 and 2135) to 6000 Series gas/vapour filters (pictures below)

502 Adaptor

2000 Series filters

NOTE: The printed side of the 5925 filter goes to the 60xx filter and the the 501 retainer clips over the filter casing.

Specifications

- Meet performance requirements of AS/NZS1716.
