

When Seconds Count.

WATER-JEL

Fire Blankets are packaged in a more contemporary and ergonomic version of the "orange canister" that has become an icon in Emergency Burn Treatment.

Modern technology has advanced the engineering and manufacturing process so that a more efficient unit can be manufactured. This allows for quicker response time in an emergency situation.

Available in 3 sizes:

- 36" x 30"
- 6' x 5'
- 8' x 6'

In a burn emergency, every second is critical. By saving precious time, you could be saving a life. Water-Jel Fire Blankets are 100% worsted wool, with an intercellular weave capable of absorbing up to 13 times its own weight of the scientifically formulated cooling gel in which it is soaked. This biodegradable, bacteriostatic and water-soluble gel immediately upon contact, begins to extinguish the flame, cool the burn and help stop burn progression and pain. It stabilizes the patient and helps prepare for transport to a burn center or ER.

- These blankets are vital in areas where high heat flames, arc flash, hot liquid, steam or chemicals exist.
- Blankets can also be used to put out fires and protect a rescuer from heat and flames.
- Medical Devices – contain no drugs or other active ingredients.
- Used by EMS, Firefighters, Utility companies, Industrial Institutions and the Military around the world.

Improved Canister Design:

- Swift removal of blanket means faster response to a burn emergency
- Black clips have been replaced - no more bending, cracking or resistance of old style.
- New Grip & Turn allows simple, quick opening.
- Easy lock mechanism keeps blanket securely inside
- Easy grasp handle on larger units makes carrying convenient
- All physical specs remain unchanged (weight, size, construction integrity)

 **WATERJEL**®
LEADING THE WORLD IN EMERGENCY BURN CARE

WATER-JEL FIRE BLANKETS IN CANISTERS AND POUCHES —

Mounting Brackets also available to hang blanket canisters on wall

WATER-JEL HEAT SHIELD

Canister
Blanket Dimensions: 8' x 6'
