

# CRISTAL

## Technical Information

### Cristal Marble Crystallizer

#### Product Description:

Cristal is an excellent crystallization liquid used to maintain polished marble, and granite. Cristal chemically transforms the stone surface similar to the methodology done at the factory. The floor is still allowed to “breathe” through microscopic channels of the stone.

#### Special Features:

Benefits include a harder more wear resistant surface, mirror like reflection, and improved stain resistance. Cristal is for use on polished natural stones such as marble, terrazzo, granite, and agglomerate.

#### Where and When to Use:

Cristal can be applied wherever the nature & condition of the floor surface permits. This product is for use on polished stone surfaces only.

#### Packaging:

1 Gallon

#### Directions for use:

1. SHAKE WELL BEFORE USING
2. Before beginning the process make sure the surface is clean and dry.
3. Spray a small amount of the product onto the surface and buff using a steel wool pad and slow speed floor machine (Below 200 rpm).
4. Repeat process until the surface has a consistent high degree of reflectivity.

#### Note:

1. Protect aluminum and brass fixtures, furniture and baseboards.
2. A 1 gallon container of Cristal will cover approximately 4500 sq. ft. (418 sq. meters)

#### Maintenance:

Contact VMC for complete specifications

#### Product Specifications:

Physical State: Liquid

Odor: Odorless

Appearance: White

pH: 1.8

Solubility in water: 80%-90%

#### Precautions Summary:

Eyes: Can produce slight irritation and sting.

Skin: Can produce slight irritation on the skin.

Ingestion: Can irritate the digestive system.

Flash point: None
